## Creative Guidelines

### Considerations

- Up to 10 cards (images or videos) within a single story ad.
- Video Captions are not available so make sure to include them in the video.
- Consider leaving roughly 14% (250 pixels) of the top and bottom of the video free from text and logos to avoid covering these elements with the profile icon or call to action. This means, if your video is 1080x1920, ensure key elements appear within a 1080x1420 title-safe area.
- Include key messaging on image / video as no copy can be included afterwards.

### Polling Sticker Ads Considerations

- Polling stickers let you ask potential customers questions using the two-question poll. Provide the activation team with the text used for the two buttons.
- Recommended to include the question used for the Poll within the creative.
- Consider for these creative type to keep your question and sticker within the center 860x1320 pixels of media. You should leave at least 110 pixels of space on the left and right side of your sticker, as well as 300 pixels of space on the top and bottom of your sticker.

## Creative Guidelines

### Do's: Use the first few seconds wisely

Bring your story to life quickly to pique interest. Consider showing brand or product imagery in the first 3 seconds.

### Do's: Tell your story with and without sound

Make sure your video ads entice viewers to click even when muted. Remember to localize your subtitles per market.

### Don'ts: Skip Zalando logo

Be sure to include the Zalando logo so the audience is not confused when landing on the Zalando website.

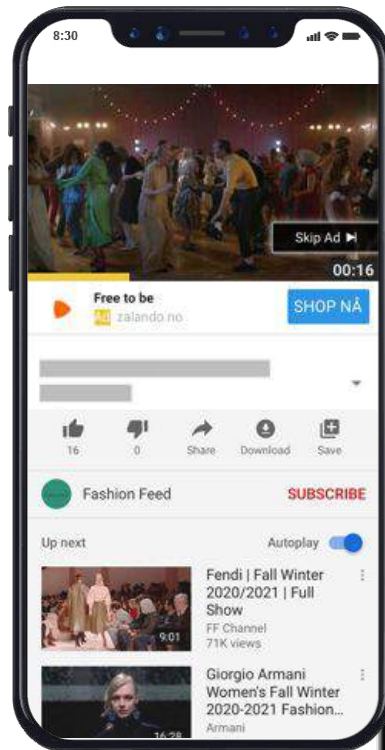

### Don'ts: Create a fully aspirational ad

For better performance, make sure that your ad is not too aspirational. Products should be visible and your brand easy to remember.

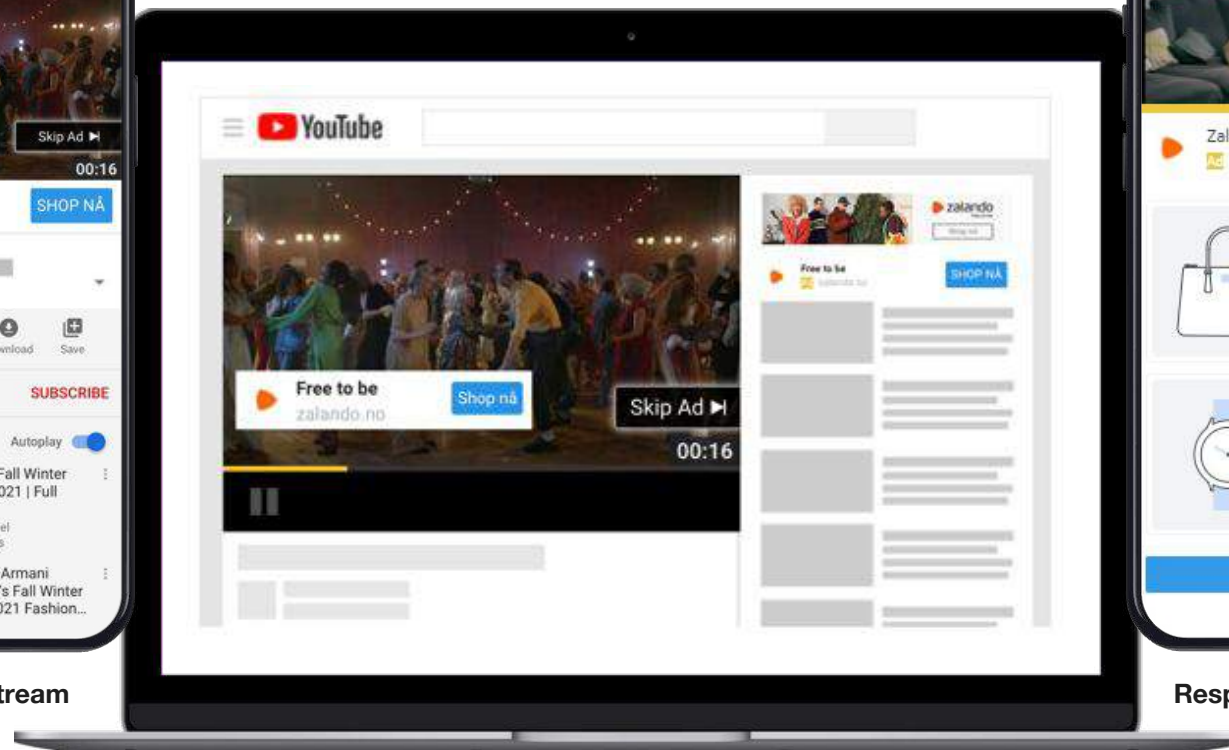

### Don'ts: Provide incorrect naming

To make it easy for us to map the right creative to the right market and language, make sure your creative naming is clear.
